

Silk Coat – Application instructions

Please make sure you have the following before Silk Coat application:

1. Silk Coat in a spray.
2. Microfiber towels.

First stage: Preparation

Clean the car body thoroughly and dry.

Second stage: Silk Coat application

1. Shake bottle well and spray in fine mist on few panels at a time. No need to cover the surface completely. 7-9 sprays per sqm are enough.
2. Remove by wiping panel gently with a fresh microfiber towel immediately after application till all white marks disappear.

Tips:

1. Cleaning the car body thoroughly is a guarantee for successful application.
2. Silk Coat could be used for windows as well – same application method.
3. Perform application under a shade.
4. Recommended consumption: 5 ml. per sqm (Normally, 25 ml. for regular size car).
5. Recommended intervals: apply Silk Coat every 3-4 months
6. After application, smooth feel to the surface and glossy look are instant results. The gloss will be enhanced even more the following day.
